Katalon Training Services

Transformative learning is as important as transformative technology. Katalon Training is designed to help you leverage Katalon Studio features to achieve successful automation. A high percentage of leaders in the information technology industry reported companies that receive professional training see an increase in profit margins and deliver successful projects.

FREE TRAINING

Take full advantage of our free online resources, including tutorial videos and courses to learn at your own pace.

KICKSTART AND ADVANCED TRAINING

Compared to other online learning materials, our paid training entails the most necessary, straightforward, and interactive curricula that are tailored to each industry and project's automation demands.

**Learn from our experts. Get hands-on experience.
Refine strategies. And start automating immediately.**

Kickstart Training

This foundation course is designed to teach you how to use Katalon Studio to automate basic Web, API, and mobile tests. With practical examples, this course covers the basic foundation of test automation and helps you discover Katalon features to apply to your automation projects.

Katalon Kickstart Training is available online only.

PROGRAM GOALS

- Understand the basic concepts of software test automation
- Understand the features in Katalon Studio for Web, API, and mobile testing
- Apply Katalon Studio features into real-case testing practices
- Set up test automation platforms and design test projects in Katalon Studio
- Improve test automation strategy for efficient Quality Assurance results

WHAT IS INCLUDED IN THE COURSE?

- 4 hours instructor-led online training
- Hands-on assignments, real-time discussions, and follow-ups with instructor
- On-demand downloadable learning materials
- Post-training Q&A support

WHO SHOULD TAKE THIS COURSE?

- Undergraduates, graduates, and working professionals who want to learn Katalon Studio and test automation without programming or coding experience
- Current users looking to explore Katalon Studio's features and functionalities
- Manual testers looking to learn and enhance test automation skill sets

PRICE

\$1,500 /10 entrants

Advanced Training

Katalon Studio Advanced Training course is designed to help you advance your full-scope automation strategies. You will gain a deep understanding of different testing types, creating tests in multiple modes, command line execution, integrating test automation into the CI/CD pipeline, and so on. Real-world assignments and on-demand consultation will help you and your organization make the most of Katalon Studio's capacities to increase the testing efficiency of your own projects.

This program is online with on-site training by request.

PROGRAM GOALS

- Fully understand all Katalon Studio features, from the basic to the advanced
- Understand the complete picture of Katalon Studio GUI, features, options, settings, preferences, modes, and other functionalities
- Create report, command-line runs, custom keywords, API testing, and integrations with other software
- Gain the ability to set up automation testing and apply automation into the Continuous Integration and Continuous Delivery pipeline
- Advance business test automation strategy to achieve accurate Quality Assurance results, reduce time and effort on testing, and deliver high-quality software products

WHAT IS INCLUDED IN THE COURSE?

- 16 hours instructor-led training, divided into sessions
- Hands-on assignments, real-time discussions and follow-ups with instructor
- On-demand downloadable learning materials
- Post-training Q&A support
- On-site training by request

WHO SHOULD TAKE THIS COURSE?

- Working professionals with Quality Assurance background looking to improve their skill set for better career opportunities in test automation
- Current users looking to leverage Katalon Studio features to apply to automation strategies
- Enterprises and large-scale automation team looking to accelerate test automation master plans

PRICE

\$5,000 /10 entrants
